

CONNECTICUT STATE MUSEUM OF NATURAL HISTORY

CONNECTICUT ARCHAEOLOGY CENTER

2008 Annual Report

University of Connecticut College of Liberal Arts and Sciences

OUR MISSION

The Connecticut State Museum of Natural History and Connecticut Archaeology Center serve the University of Connecticut and the public by promoting an understanding and appreciation of our natural and cultural world, especially as related to New England.

Board of Directors

William Morlock, Chairman
Melanie Attwater-Young, CT Department of Agriculture
David Bingham, M.D.
Liz Buttner, CT Department of Education
Carmen Cid, Biology, ECSU
Jean Crespi, Geosciences and Biology, UConn
Steve Fish, CT Department of Environmental Protection
Carl Lindquist, M.D.
Natalie Munro, Anthropology, UConn
Dennison Nash, Anthropology, UConn, Emeritus
Morty Ortega, Natural Resources, UConn
Karin Peterson, CT Comm. on Culture & Tourism
David Wagner, Biology, UConn
Walter Woodward, State Historian, UConn

Staff

Nick Bellantoni, State Archaeologist
Susan Broneill, Museum Receptionist
Cheri Collins, Program Coordinator & Collection Manager
David Colberg, Public Information & Marketing Coordinator
Collin Harty, Exhibit and Communication Design
Leanne Kennedy Harty, Director
Emily-Rose Lanz, Membership Coordinator
Robert Thorson, Stone Wall Initiative

Student Staff

John Chen
Lauren LeShane
Sarah Morton
Amanda Sullivan

2019 Hillside Rd., Unit 1023, Storrs, CT 06269-1023 www.mnh.uconn.edu • 860-486-4460

Within the mission, the Museum's fundamental goals are to acquire and preserve collections and to use collections, exhibits, and programs:

- To cultivate an interest about natural history among the citizens of Connecticut.
- To communicate the significance and vulnerability of archaeological and natural resources.
- To enhance University learning, teaching, and research.
- To enrich elementary and secondary education.
- To acquire and present knowledge about the natural and cultural history of Connecticut and New England.
- To showcase the academic resources of the University of Connecticut and provide a public connection to them.

FROM THE DIRECTOR

Museum Director Leanne Harty with State Archaeologist Nick Bellantoni

Dear Friends,

The reopening of our renovated building in 2007 marked the fulfillment of a major goal for the Museum and Archaeology Center. By creating dedicated programming space and developing new permanent exhibits, we have been able to better serve visitors and expand our efforts to explore the fascinating relationships between nature and culture in our region over time. Since the reopening, we have significantly increased our on-campus contribution to the University and welcomed an ever-expanding array of visitors to our facility.

In the spring of 2008, our Board and Staff began the task of developing a new five year strategic plan. Asking and answering questions about where we want and need to go as an organization, we worked together to define and articulate a clear strategy for how to get there.

As this annual report and our new strategic plan were being completed, information about our State's financial crisis began to fill the newspapers and airwaves. The full impact may not be felt for many months, but we do know this crisis will have a lasting effect on the budgets of the State, the University, the College of Liberal Arts and Sciences, and our Museum. While our vision of the Museum's future has not changed, the challenge of advancing our mission in this new economic climate will need to be accommodated.

As we work to "do more with less", we are determined to find new opportunities too. Times like these inspire new ways of approaching problems, and creative collaborations will arise from the need to maximize and share resources. In lean economic times the Museum's investment in creative collaboration, public engagement, and interdisciplinary activities will pay increased dividends. We are pleased that the recently-established Dorothy C. Goodwin Fund will help us develop a new partnership with the Neag School of Education's Teachers for a New Era program in the coming year, enhancing teacher preparation in Connecticut by utilizing Museum and Archaeology Center resources.

Our organization is not alone in this situation, and we feel fortunate to have committed donors and members like you during these times. Going forward, your support and generosity will continue to make all the difference. With leadership from Board Chairman Bill Morlock and Jeremy Teitelbaum, our new Dean in the College of Liberal Arts and Sciences, we will continue to turn challenges into opportunities and work together to achieve our organization's long term goals.

Thanks, as always.

Leanne Harty, Director

MUSEUM TIMELINE

1880
Charles & Augustus Storrs offer the State of Connecticut 170 acres of farmland to establish an agricultural school for boys.

1881
Benjamin Koons, faculty members and president of the school, establishes the natural history collection.

2008 HIGHLIGHTS

As part of the College of Liberal Arts and Sciences at UConn, the Connecticut State Museum of Natural History shares an important academic tradition. This tradition is founded not only on passing knowledge to future generations, but also on applying this knowledge to solve problems and improve the quality of people's lives. The University of Connecticut is on the forefront of teaching and research in the sciences and humanities, and having direct access to University resources is one of the Museum's greatest assets. Museum programs and exhibits explore the dynamic relationships between nature and culture through time, sharing university research and scholarship with visitors of all ages and backgrounds. The Museum fosters the University's commitment to lifelong learning by creating opportunities for diverse audiences to acquire new knowledge, develop critical thinking skills, and gain broader perspectives on issues that effect their communities, their world, and their lives.

2007-2008 was a gratifying year for the Museum and Archaeology Center. The excitement and momentum of the Museum's facility expansion carried over into every facet of the Museum's operations and programming, increasing awareness, participation, and donor support for the Museum and Archaeology Center throughout the year. The Museum's new permanent exhibit, *Human's Nature: Looking Closer at the Relationships Between People and the Environment*, has been extremely well-received, and provides visitors of all ages with unique opportunities to explore how the natural history of southern New England has shaped the lives of the people who live here and how people, in turn, have shaped the environment. The Museum's adjoining program space became a popular special event and conference location for the entire University, expanding the Museum's on-campus role by hosting an array of receptions, alumni programs, educational activities, and professional meetings for participants from across the state.

This year, State Archaeologist Nicholas Bellantoni was elected President of the National Association of State Archaeologists, expanding our contributions beyond the state. The National Association of State Archaeologists consists of the official State Archaeologist from each U.S. state and territory. Dr. Bellantoni will lead the national association in the development of consensus views concerning the conservation of the Nation's cultural resources and will provide guidance and direction regarding laws, procedures, current research, educational programs, and ethical standards related to the archaeology field.

EDUCATION

Through the Museum's permanent exhibit, *Human's Nature*, campus programs, community involvement, and outreach activities, the Museum served more than 90,000 people this year. Program highlights and an accounting of participation follows:

Public Programs & Events

This year, the Museum presented 71 advertised public programs. The summer, fall, and spring seasonal brochures were sent to members and nonmembers on our mailing list. Program brochures were also made available at community events, different departments on campus, and through other organizations that have a cooperative relationship with the Museum. These programs were promoted on the Museum website, and newspaper, internet, and electronic campus announcements.

This year's programs included family activities, field workshops, ancient technologies workshops, children's workshops, drop-in children's activities, lectures, day trips, day camps, an adult archaeological field school, community events, and special events. The Museum also participated as an exhibitor at the Archaeological Institute of America/Museum of Science Family Archaeology Fair at the Museum of Science in Boston, the Mashantucket History Fair at the Mashantucket Pequot Museum and Research Center, the Mansfield Know Your Towns Fair, the "Big E" Eastern States Exposition, the Connecticut Flower and Garden Show, and the CPTV Science Expo.

The Museum's new 2nd floor programming space became a popular location for meetings and receptions during 2007-2008. Approximately 750 people attended events from the annual meeting of the Illustrator's Guild of New England in October to the Office of State Archaeology's 20th Anniversary Reception on May 3.

The Museum's programming underscores our mission statement, to explore how the natural history of southern New England shapes the lives of people and, in turn, how people have shaped natural history, by promoting a greater awareness and appreciation for the region's biodiversity and archaeological heritage. The public programming and outreach topics are carefully chosen to mesh with the goals of the mission while offering the public diverse, informative, and enjoyable experiences. Each program, from historical house tours to mineral collecting field workshops, explores the vital dynamic between natural history and human culture.

1913
The most complete mastodon found in New England is uncovered in Farmington, CT.

1916
The "Museum Room" is open to the public in the Old Main building on the heart of campus.

1923
The "Apple Sales Building," future home of the Connecticut State Museum of Natural History, is built.

1939
What was once the Connecticut Agricultural College becomes the University of Connecticut.

1939
The College of Arts and Sciences is established as one of seven divisions of the newly named University.

1940
The Wilber Cross Building opens as the University's library.

The Museum continues to offer programs with new topics and activities that have been met with enthusiastic and increasing participation by Museum patrons. In addition to presenters from the Museum's "home" departments of Anthropology and EEB, lecture and workshop presenters from other departments and organizations included the following: UConn's Physics Department, UConn's History Department, UConn's Oral History Department, UConn's Fine Arts Department, UConn's NEAG School of Education, UConn's Chemistry Department's Outreach Center, The Ballard Puppetry Institute, "Project O" at UConn Avery Point, Friends of State Archaeology, Public Archaeology Lab, Inc., Connecticut Valley Mycological Society, Holyoke Community College, The Watkinson School, Connecticut Landmarks, members of the World Atlatl Association, Bristol Gem and Mineral Club, Cedar Hill Cemetery Association, White Memorial Conservation Center, Blue Slope Farm, the National Weather Service, and independent experts Dr. Kathryn Kotula, Jim Dina and Steve Brill. UConn undergraduate and graduate student attendance at public programs continues to increase and the Museum is working to encourage that trend.

The Museum and Archaeology Center continued the successful archaeology summer day camps in 2007, with three different sessions at an authentic archaeological site on the UConn campus. The site, selected in cooperation with the College of Agriculture and Natural Resources and the State Historic Preservation Office in 2004, is an ongoing archaeological investigation under the supervision of UConn archaeologists. All artifacts recovered in the excavation, as well as the field notes written by each child, become a part of the State of Connecticut's Archaeological collections, and contribute to our understanding of Connecticut's past. A selection of the artifacts recovered by the students has been exhibited in the Museum of Natural History, and subsequent excavations will update that portable display.

The summer of 2007 was the debut for the Museum and Archaeology Center's week long Field School for Adults, led by the State Archaeologist. Fourteen participants spent the week in the classroom, the lab, and at an archaeological dig during this intensive class. Participants came from varied backgrounds, from interested students to members of historical societies to police officers. The participants were unanimously enthusiastic about this field school.

Strong participation from University students was evident at the Atlatl Day and Knap-in on campus on September 29. Over 130 people attended this event, sponsored by the Farm Services Department, Friends of State Archaeology, and the World Atlatl Association in collaboration with the Museum.

This year, the Museum and Office of State Archaeology hosted the combined spring meetings of the Archaeological Society of Connecticut and the Massachusetts Archaeological Society. These meetings were open to the public, and included eight talks by archaeologists from the southern New England area.

In addition to these highlights, the Museum offered thirteen field-learning workshops, fifteen family activity programs, one ancient technologies workshop, eight children's drop-in activities, one "kids only" workshop, two day trips, nine Museum lectures, and co-sponsored six Teale lectures and one Friends of the Office of State Archaeology Annual Meeting lecture.

2008 ATTENDANCE

School Group Visits and Outreach

The Museum provides a variety of outreach programs designed to meet the needs of organizations throughout the State of Connecticut. These programs are not always publicized, but are special outreach activities that range from small group presentations in local schools to larger organized events. The establishment of the Connecticut Archaeology Center within the Museum has resulted in increased interest in specialized programs, leading to the development of new activities that align with school curricula in many relevant areas.

The Museum's permanent exhibit was a destination of interest for visitors from camp and enrichment groups statewide. In July, groups of visitors from the Sweeney School, University of Hartford's Summer Place, CREC, Breakthrough New Haven, and the Community School for the Arts came to tour the exhibit. In August, groups from the Mystic Nature Center, UConn's Alumni Center, and Girls Inc. of Hartford all toured the exhibit.

In November, all of the students in UConn's Anthropology 102 classes came to tour the exhibit as a part of their coursework. Hall High School came to the Museum as a part of an ongoing program with the State Archaeologist; they toured the exhibit, and attended a presentation by the State Archaeologist. In December, 50 students made unscheduled visits to the Museum.

Students from New Britain High School and fourth grade students from Smalley Academy in New Britain visited the Museum in March. In April, students from Newington High School visited the Museum for a presentation by the State Archaeologist and a tour of the exhibit. In May, 100 fourth grade students from EASTCONN visited the Museum for a planned archaeology activity and a tour of the exhibit, and 100 high school students from New Britain High School toured the exhibit.

On June 30, the Museum presented an archaeology unit as a part of the 4-H Teen Connection Conference at UConn.

The Museum participated in the Enrichment Cluster program at the Southeast School in Mansfield in May and June. Students took part in a hands-on workshop where they examined bones and skeletons, utilizing specimens from the Museum's natural history teaching collection.

1940s
Plans for a new Alumni-Student Union include a wing for a Natural History Museum, which never comes to full fruition.

1963
The Norris Bull collection of over 10,000 Connecticut Native American artifacts is donated to the University of Connecticut.

1982
Dr. Carl Rettenmeyer makes a case to the University's Board of Trustees to establish a new museum of natural history.

1982
Dr. Rettenmeyer is appointed the first Director of the Connecticut State Museum of Natural History.

1983
The museum establishes a General Endowment.

1983
A 15-foot great white shark, hooked off of the end of Long Island, is donated to the museum.

COLLECTIONS & LOANS

Through formal loans, artifacts and biological collection materials are more frequently being utilized by other institutions, creating a Museum presence in numerous locations across the state. On permanent loan to the Mashantucket Pequot Museum are 70 objects from the Anthropological Collections at UConn which are featured in exhibits throughout the facility with appropriate acknowledgements. The artifacts were selected for exhibit prior to the opening of the Museum and Research Center in 1998, and many thousands of visitors have had their learning experience enhanced as a result of this loan.

Within the university, specimens from the Museum and Archaeology Center are on exhibit in other locations, such as the Biological Sciences and Physics Building, Torrey Life Sciences Building, the College of Liberal Arts and Sciences lobby, and in changing exhibits at the Babbidge Library and Dodd Research Center.

The Museum of Natural History's materials are also being exhibited at other organizations in Connecticut. Trowbridge Nature Center rents mounted bird and mammal specimens and photographic displays for their changing seasonal exhibits three times each year.

It has been an exciting year for the Collections Department. On June 6, Charles Platt donated the 892-plus Charles Caswell Collection of Native American archaeological artifacts. These stone and ceramic artifacts are of historical as well as archaeological interest, as some of Caswell's finds were included in the Norris Bull Collection.

Also in June, retiring teacher Louise Taylor donated a large collection of ethnographic teaching materials from Latin America and Spain. She had used these items during her teaching career in the public schools, and the Museum will continue to use them to educate children.

Dr. Douglas Jordan was Connecticut's first State Archaeologist and an Emeritus Professor at UConn. After his death, his daughter, Mandy Jordan, donated his extensive library of anthropological and archaeological books and journals, as well as a collection of reproductions of pre-industrial technologies for teaching purposes.

In November, Jon Bayer and family presented a collection of 3,000 southeastern Connecticut artifacts collected by his father, Louis Bayer, to the Office of State Archaeology and Connecticut Archaeology Center. On hand was Kathy Hoy, who had worked with Louis Bayer to organize and document this collection during her time as a UConn Anthropology Department graduate student.

In April, Donna Wojdak of Connecticut DEP initiated discussion about semi-permanent loans of natural history specimens for exhibit at the newly opened Peoples State Forest Nature Center at Peoples State Forest in Barkhamsted. She came to the Museum's collections facility on April 15, and selected a variety of items for their museum. We are working with the Nature Center to offer expanded public programming in the western part of the state.

1985
The Connecticut State Museum of Natural History is officially established by the Connecticut State Legislature.

1985
The Museum opens its doors to the public in the Wilbur Cross Building.

1985
The A.J. Carpenter Collection of Butterflies is accepted by the Museum.

1987
The Office of State Archaeology is established by the Connecticut State Legislature, as a part of the Museum of Natural History.

1988
The Museum accepts the Rex Brasher collection of bird paintings.

1992
The Barnum/Secor anthropology collection of over 18,000 artifacts is transferred to the Museum.

RESEARCH & PRESERVATION

Ceramic Vessel
From the Norris Bull Collection

Office of State Archaeology

State legislation has established numerous areas of responsibility for the Connecticut Office of State Archaeology (OSA), and as economic development projects increase in the state, the volume of work associated with each of the following duties has increased:

- Oversight of in situ preservation, archaeological excavation, or reburial of Native American human remains uncovered by any ground disturbance
- Curatorial oversight of over 600,000 artifacts repositied at the Connecticut State Museum of Natural History
- Oversight of an inventory of Native American cemeteries, and preservation of other human remains and cemeteries
- Acting on recommendations made by the Native American Heritage Advisory Council
- Providing recommendations on proposed State Archaeological Preserves, and serving on the River Protection Advisory Committee
- Archaeological salvage of properties threatened with destruction
- Public and private research of "the highest possible standards in archaeological investigations"
- Publication and dissemination of information about the ethnohistory of the region, and answering inquiries about the state's archaeological resources
- Maintaining comprehensive site files and maps (more than 5,000 records)
- Membership on the Historic Preservation Council, which advises the Connecticut Commission on Culture and Tourism

In fulfilling these duties, State Archaeologist Nicholas Bellantoni is involved in numerous field excavations and related research each year. Notable among these was the project to locate the graves of 46 British prisoners of war who died of smallpox in Milford. Research into New England vampire folklore continues to expand, and Bellantoni's work documenting the exhumation and reinterment

of Henry Opukaka'ia was featured in the Fall 2007 Special Issue volume of *Connecticut History*, published by the Association for the Study of Connecticut History.

Charged with reviewing all proposals for construction and modification of land where archaeological sites may be located in Connecticut, the State Archaeologist conducted over 100 field reviews and site meetings in communities through May of this year. In addition, the OSA evaluated 256 project proposals for state municipalities during that period using site files and other reference materials. Over 20,000 miles were logged in OSA travel this year.

The Friends of the Office of State Archaeology, Inc. (FOSA) is the volunteer organization that assists the State Archaeologist in fieldwork and routine laboratory activities. The organization has approximately 100 dues-paying members who contributed over 3,000 hours of their time in support activities. This year Nick Bellantoni and Leanne Harty worked closely with the FOSA Board of Directors to establish long term goals and objectives for the organization within the new Archaeology Center. Together with Bellantoni, they worked to evaluate funding opportunities with an eye toward securing additional staff to help provide services and improve the efficiency of the OSA.

The Office of State Archaeology provides a wide variety of public education services. This year Bellantoni made over 50 public and academic presentations as well as professional training programs. Requests to the OSA for public presentations and professional training continue to increase, and the Museum has formalized a new system to route such requests. Using a Speaker's Bureau format, many requests are now prioritized and scheduled through the Museum's administrative offices, freeing the state archaeologist of time-consuming scheduling duties and helping to ensure that high priority requests are fulfilled.

1996
Dr. Carl Rettenmeyer retires as the Director of the Museum. Jan Taigen is appointed Interim Director.

1997
Volunteers establish the Friends of the Office of State Archaeology (FOSA) to support the Connecticut Office of State Archaeology.

1998
The Museum moves under the College of Liberal Arts and Sciences.

1998
Dr. Ellen Censky is hired as Director of the Museum.

1999
The Museum conducts Connecticut's first State Bioblitz in Keney Park, Hartford.

1999
Due to UConn 2000 renovations the museum closes its public exhibit space in the Wilber Cross Building.

PUBLIC INFORMATION, MARKETING & MEMBERSHIP

Photo by John Spaulding

Barred Owl, *Strix varia*
From the Eugene Allen Collection

The grand reopening of the Museum and Archaeology Center in the spring of 2007 created significant momentum in realizing a number of the Museum's primary membership and marketing goals for the year. This included increasing the awareness of the enhanced Connecticut State Museum of Natural History and Archaeology Center, and highlighting *Human's Nature*, the new permanent exhibit. Furthermore, the added attention brought by the reopening amplified public attention to the Museum and Archaeology Center's ongoing educational offerings and archaeological endeavors.

Public Information & Marketing

Through the use of the museum's ever-expanding marketing and outreach databases, the museum was featured in a multitude of media platforms, from traditional and online local publications to national media outlets. Highlights include the following:

The 2007 Connecticut State BioBlitz continued to make news well into the 2007-2008 academic year, and was cited in an article in the National Science Teachers Association's national publication *NSTA Reports*.

Archaeology School for Adults, a new weeklong program offered by the Museum and Archaeology Center, received quite a bit of media attention from outlets such as the *UConn Advance*, *Daily Campus*, *The Reminder*, the *Hartford Courant*, and the *Norwich Bulletin*. The program offered participants the exclusive opportunity to spend an entire week learning from and working with State Archaeologist Nicholas Bellantoni.

A \$1-million private gift to the Museum by Mrs. Julia B. Budney and the donation of the Henry S. Budney Natural History Collection, comprising more than 115 high quality vertebrate mounts and assorted ethnographic items, continued to receive noteworthy local, national, and international media attention. The gift, to promote the museum's educational programs and to be used for the design and construction of the next phase of the museum's renovations, was covered by media outlets such as *The UConn Advance*, Fox 61 WTIC, the *Hartford Courant*, CW20 WTXN, *United Press International*, *The Stamford Advocate*, *dailyindia.com*, the *Malaysia Sun*, the *Earth Times Online Newspaper*, *The Boston Herald*, WCBS Radio, and *newsday.com*.

Another important donation to the museum, the Louis M. Bayer Artifact Collection, was reported on by numerous news outlets such as NBC 30, *The Willimantic Chronicle*, *The New London Day*, and *Hartford Courant*. The collection of

more than 3,000 indigenous Connecticut artifacts, collected by Mr. Bayer from 1937 to 1970, has become part of the University of Connecticut's substantial anthropological collections and will be used as a resource for historical and archaeological research projects, graduate student theses and dissertation research, and public educational exhibits.

It is relatively common for most of the individual educational programs offered by the Museum to receive some media coverage, from a short description of the program in various print and online outlets' upcoming events sections to a feature length story focused on the activities of the presenter and program participants. Some examples of Museum programs that were featured in the media included a talk and book signing by Dr. Ron Mallett, UConn Physics Professor and author of *Time Traveler*. Dr. Mallett's book, *Time Traveler*, is an autobiographical account of his lifelong quest to design and build a machine for time-travel. Also receiving a media attention were two programs lead by Dr. John Bell, "Shadow Puppets around the World" and "Shalako Puppets." Dr. Bell is the Director of Ballard Institute and Museum of Puppetry at UConn and an internationally renowned puppeteer, professor, and historian of Puppet Theater.

It is difficult to document completely when the Connecticut State Archaeologist, Nicholas Bellantoni, is in the news. The work of the State Archaeologist is consistently reported on by the media. A number of prominent stories featuring the State Archaeologist this year included his ongoing work with the Venture Smith project and his work with a number of state and local law enforcement investigations. Dr. Bellantoni was also featured in a WTNH 8 special presentation "Lost: A plane crash from the past," the story of two Hellcats that collided above the Thames River and crashed in eastern Connecticut on October 19, 1944, killing both pilots. Most recently, New Haven and Fairfield County media outlets have covered Dr. Bellantoni's work with Southern Connecticut State University Professor Valerie Andruchko and her students on a project to identify old skeletal remains found in Fairfield's Sturges Park.

Membership

The Museum's members continue to be a strong asset to the organization, both in generating revenue and building community relations. Many members have been supporting the Museum for decades. They can testify how far the organization has come and are genuinely excited with the prospects for the Museum's future. Members regularly participate in lectures, programs, and workshops both on campus and across the state. Many Museum members are also involved in several community organizations or historical societies, strengthening the ties between the Museum and the communities it serves.

The Membership Office executed a small membership drive in July 2007, targeting former members who had not renewed their membership since 2003. The purpose behind this membership drive was twofold—to bring lapsed members back into active membership and also to identify people who could be removed from the membership mailing list, thereby cutting printing and postage costs.

Moving ahead, the Membership Office looks forward to offering more members-only events and programming. In May 2008, the Museum's Owl-Level Members and Donors were among supporters invited to the celebration honoring 20 years of the Office of State Archaeology. Over 100 people were in attendance, many of them long-time Museum members. Events like this, especially when held in the Museum's exhibit and classroom space, bring people to the building that may not participate in workshops or programs and gives them exposure to the exhibit, *Human's Nature*, which is a key element in the Museum's mission of educating the public about the interaction between the natural world and human culture. By offering more events of this type and other members-only programs, the Membership Office hopes to enhance the membership experience by fostering the sense of community among the Museum's members and giving more value to becoming a member.

1999
The Museum is approved to relocate to its new home in the old "Apple Sales Building" on Hillside Road.

2000
The Museum offers the long-term loan of Native American artifacts for use in the Pequot Museum's new permanent exhibits.

2000
Phase I of the Museum's new building renovations are completed, creating administrative offices and a small exhibit area.

2003
Dr. Ellen Censky steps down as Director of the Museum

2004
Lou Lent celebrates her 20th year as a Museum volunteer.

2004
Interim Director, Leanne Hartly, is appointed Director of the Museum.

FINANCIAL SUMMARY* FOR THE YEAR ENDING JUNE 30, 2008

FY 2008 DONATIONS & MEMBERSHIP

FY 2008 OPERATING EXPENSES

2004
The Connecticut Archaeology Center is established as a part of the Museum of Natural History.

2004
The Stone Wall Initiative becomes part of the Connecticut State Museum of Natural History.

2006
The Museum's total endowments surpass \$1M

2007
The Henry C. Budney Vertebrate Collection is transferred to the Museum. The Julia B. Budney Fund is established.

2007
Phase II renovations are completed. The Museum opens its permanent exhibit, "Human's Nature," and two new classrooms.

2008
Phase III expansion initiated, with plans for new collections facilities, archaeology lab and professional research library.
